

Trip advisor reconnaissance report

for better user experience see it in notion use the following link :

 [Trip advisor reconnaissance report](#)

1) Discovering the IP addresses

First of all I started by trying to discover the ip address using the following command

```
nslookup tripadvisor.com
```

as you can see in the image we got local server ip address which is 192.168.20.78
DNS server ip addresses we can use it in the future during enumeration

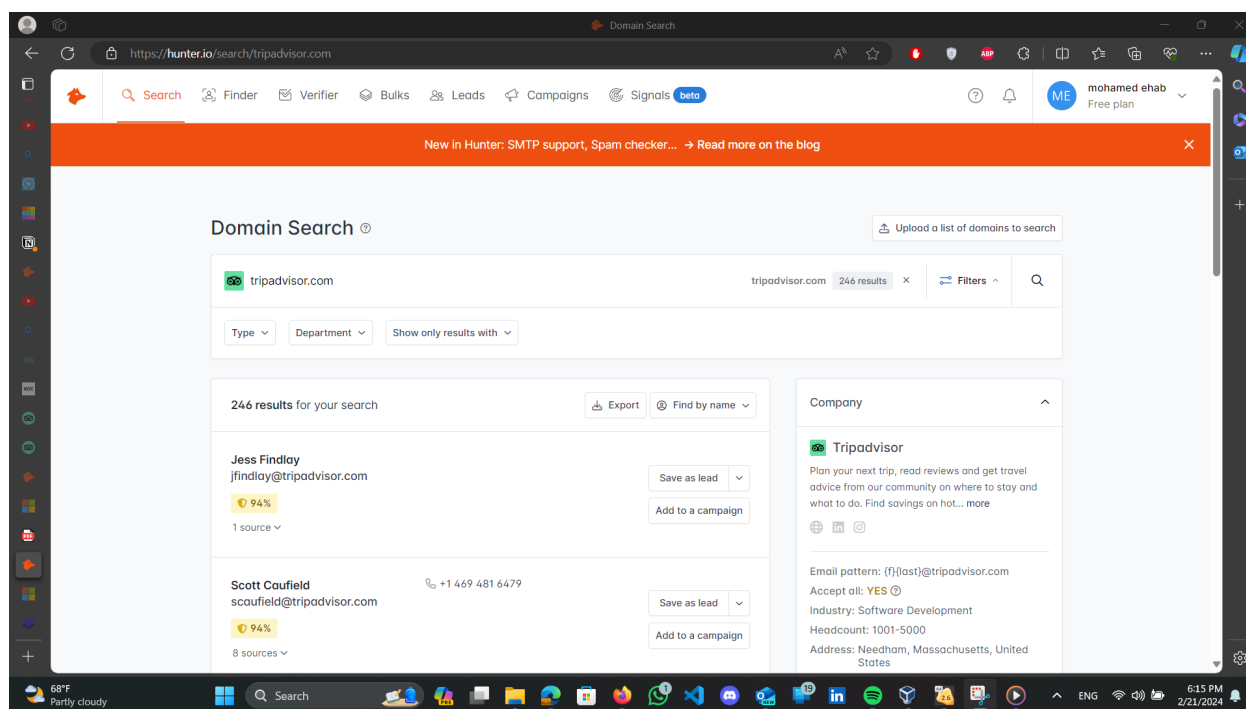

```
File Machine View Input Devices Help
Server Not Found — Mo... root@kali: ~/Desktop
root@kali: ~/Desktop
File Actions Edit View Help
root@kali)~[~/Desktop]
# nslookup tripadvisor.com
Server:      192.168.20.78
Address:     192.168.20.78#53

Non-authoritative answer:
Name:   tripadvisor.com
Address: 151.101.130.28
Name:   tripadvisor.com
Address: 151.101.66.28
Name:   tripadvisor.com
Address: 151.101.2.28
Name:   tripadvisor.com
Address: 151.101.194.28

root@kali)~[~/Desktop]
# nslookup https://www.tripadvisor.com
```

2) email addresses - phone numbers - jobs - physical address

then I went to [hunter.io](#) to discover email addresses , email pattern , phone numbers , jobs and physical address as you see in picture

the mails we got from hunter.io were

Jess Findlay

mail: jfindlay@tripadvisor.com

Scott Caufield

mail: scaufield@tripadvisor.com

phone number: +1 469 481 6479

Jane Owen

mail: jowen@tripadvisor.com

job: Interactive Media

Samuel Johns

mail: sjohns@tripadvisor.com

job: CMO

Inma Solis

mail: isolis@tripadvisor.com

Tara Lieberman

mail: tlieberman@tripadvisor.com

job: COO

phone number: +1 781 800 5579

Ellie Botelho

mail: ebotelho@tripadvisor.com
phone number: +1 781 800 5542

Robin Ingle

mail: robin@tripadvisor.com
job: Vice President International Development

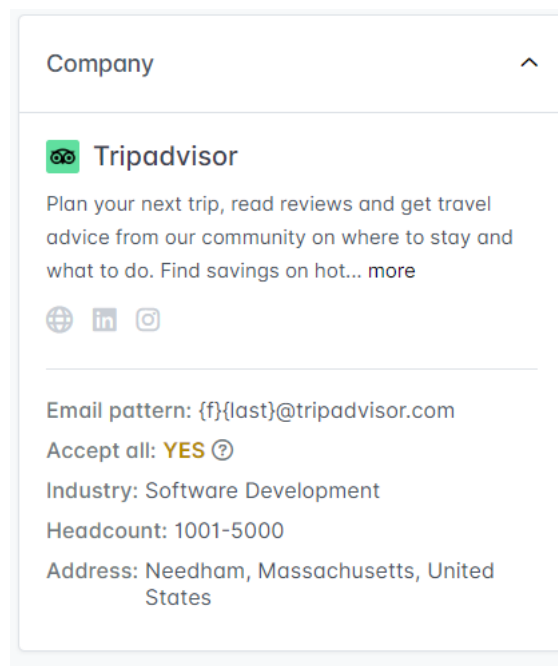

Steve Kaufer

mail: skaufer@tripadvisor.com
job: CEO
phone number: +1 617 670 6300

Massimiliano Gallo

mail: mgallo@tripadvisor.com
job: Territory Manager

email patterns and physical address are clearer in following picture

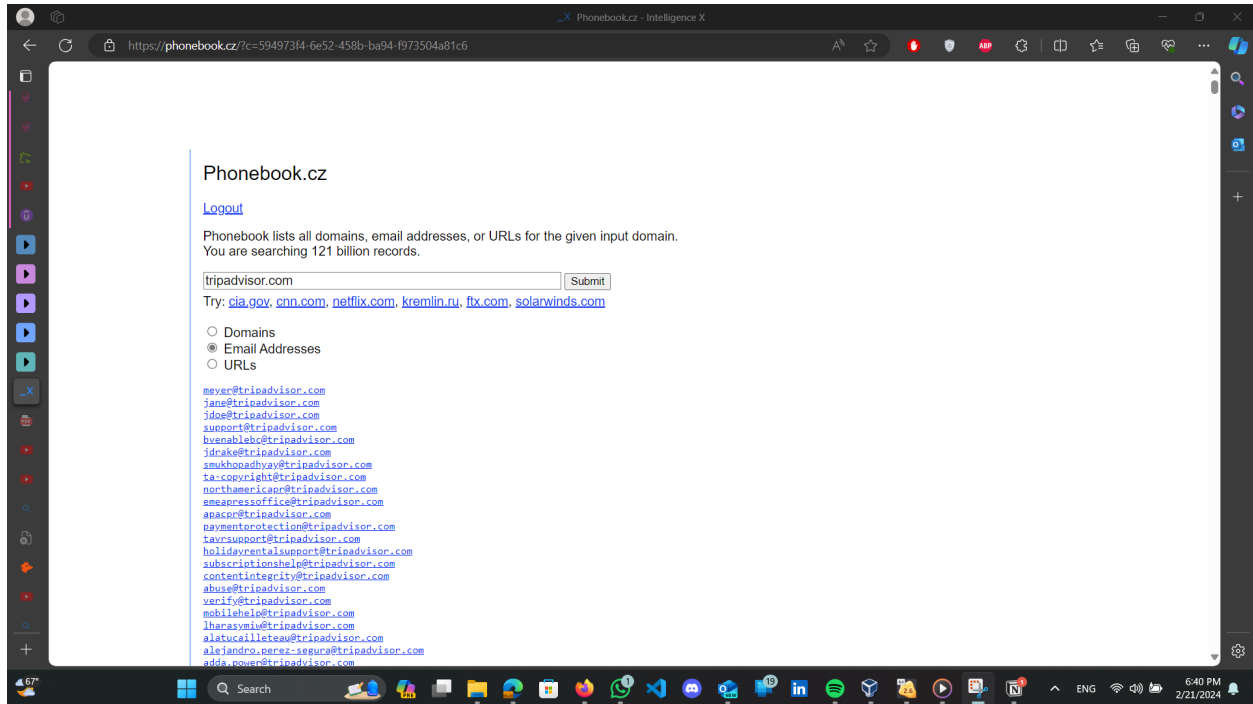

email pattern is

`{f}{last}@tripadvisor.com`

it easy to analyze from the above mails as you can see the email always begins with the first letter of the fist name and the full last name except Vice President International Development they took the full first name only

physical address is Needham, Massachusetts, United States

then I also went to phonebook.cz to gather more email addresses from it and entered my domain which is tripadvisor.com as you see in the picture

and got this email addresses

3) discovering the subdomains

I used subfinder to discover the subdomains and redirected the output of command to text file the using the following command as you see in the photo

```
subfinder -d tripadvisor.com > tripAdvisor_Subdomains_using_subfinder.txt
```

I discovered 673 subdomains which are

4) Trip advisor technologies

I discovered from [hunter.io](#) that the tag managers are Google Tag Managers and the application is running on Apache web server as you see in the photo

I discovered using Wappalyzer extension that tripadvisor uses Google Analytics for Analytics , Akamai for a CDN ,VideoJS as Video player , Envoy for a reverse proxies , OneTrust for cookie compliance , Google_Sign-in for authentication and both Akamai Bot Manager and DataDome for security as you see in the photo
